

## WP4 - Training for trainers

Training for trainers for Greek and Croatian partners is based on the training programme drawn up as part of WP4.

In particular, training provides one basic module on migration medicine and transculturality as well as three specialist modules: holistic protocol for age assessment, infectious diseases and dermatology.

## CARE project

The CARE project, in fact, aims to promote access to appropriate health care for migrants and refugees, through an integrated model for healthcare provision.

The activities of CARE are expected to increase coordination at EU level, as they are supposed to enable the cooperation between practitioners and health authorities across Europe, boosting the development of valuable expertise, while supporting public health.

**CARE**

Common Approach for REfugees  
and other migrants' health

## WP4 TRAINING

# Hotspot and Migrants' Centres Health Management

## Training for trainers

6th - 8th September 2016  
Rome, Via di San Gallicano 25/A

## Project Contact

INMP (National Institute for health,  
migration and poverty – Rome, Italy)

Care staff:  
[care@inmp.it](mailto:care@inmp.it)  
Tel. 0039 0658558259

## Project PARTNERSHIP

The project Consortium consists of a broad and highly skilled mix of public health authorities and civil society organisations from 5 European Countries (Italy, Greece, Malta, Croatia, Slovenia), all with scientific, policy and public health background, who can ensure that the project will successfully meet its objectives.

# Hotspot and Migrants' Centres Health Management Training for trainers
